

Jaime Meza

Fullstack Web Developer

Professional Profile

Full Stack Web Developer with over two years of hands-on experience building and maintaining scalable web applications using ASP.NET Core and Angular. Adept at designing secure APIs, implementing responsive UIs, and managing databases with Entity Framework and SQL Server. Skilled in CI/CD practices and cloud deployment using Microsoft Azure. Known for delivering clean, maintainable code within Agile teams and collaborating across multicultural environments.

Professional Experience

Jr Web Developer Nov 2022–Presente
Pevaar

- Maintained and developed new features for a multi-tenant ASP.NET Core Web API, upgrading from .NET 6.0 to .NET 9.0.
- Built and improved Angular components (v9 to v18) with custom theming and responsive design using SASS.
- Managed SQL Server databases through Entity Framework Core, optimizing queries and data integrity.
- Supported CI/CD processes and application deployment in Microsoft Azure.

Entry-Level Web Developer Dec 2024 – Jun 2025
(Support)

Team International

- Designed and deployed SEO-optimized websites using the Duda platform for language learning services.
- Created reusable dynamic widgets integrating third-party APIs with JavaScript.
- Enhanced internal tooling, reducing content update cycles and improving turnaround time.
- Collaborated with a multicultural, English-speaking remote team across time zones.
